## Missed a word? No problem!

Mauril is designed to immerse you in authentic, natural language. Missing a word or two is ok, as it simply means your brain is getting used to the rhythm of the language. Here's a tip: check out the video's description and themes before viewing, and consult the vocabulary items before and after watching each video.

## Take on real-life challenges!

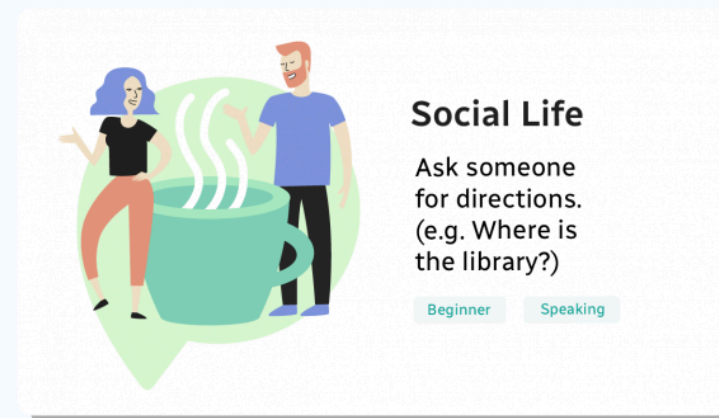

Pay attention to the challenges section at the end of each unit, where you'll find suggestions like 'Write down your grocery list' or 'Name three tasks that you do at work'. It's a great way to consolidate learning and get real-life practice. Find a friend who is learning the same language and take on challenges together!

Here are some other useful words or expressions:

|                   |          |
|-------------------|----------|
| Avoir besoin de   | Français |
| To need           | Anglais  |
| À un moment donné | Français |
| At some point     | Anglais  |

## Adjust player settings

Our content player is equipped with many helpful and familiar functions. Turn on the subtitles in the language you are learning to read the words as you listen. Slow down the pace of a video to help you better understand speech and don't hesitate to pause or re-listen to any segment.

Supports in place your child.

Invite them to do the placement test. Then it goes from there... (and you can too if you want to start learning French!)
