

Westview Secondary's Mathematics Department offers a variety of courses designed to meet the needs of all students. It is important that students select courses that suit their interests, as well as their career and post-secondary aspirations. The Mathematics Department provides a Mathematical curriculum that helps students:

- Develop an appreciation of the role of Mathematics in every day life
- Develop strong Mathematical skills
- Develop self-confidence and enjoyment in the study of Mathematics

The study of Mathematics requires regular study and practice. It is expected that students complete assignments on a daily basis. Most of our Mathematics courses will end with a final exam and all grade 10 Mathematics courses have government final exams.

Note: All Mathematics students in grade 10, 11 and 12 will use a workbook. Students should talk to their Mathematics teacher regarding these workbooks.

The Mathematics streams are outlined in the chart below:
